**Greenhouse Gas Emissions Management Policy
of Ural Oil & Gas LLP**

Ural Oil & Gas LLP adopts Greenhouse Gas Emissions Management Policy to reduce Partnership's impact on the environment and commits to reducing greenhouse gas emissions resulting from Partnership's operations.

This policy complements Partnership's Environmental Policy and its purpose is to mitigate negative impact that our operations have on the environment through greenhouse gas emissions.

To achieve this goal, Partnership is guided by the following principles:

- Compliance with the requirements of international standards and agreements to which the Republic of Kazakhstan is a party, requirements of RoK legislation, as well as internal documents of NC KazMunayGas JSC in the field of greenhouse gas emissions management.

- Identifying risks associated with greenhouse gas emissions and working on mitigating and managing any adverse impacts that the Partnership's activities may have.

- Regular monitoring of greenhouse gas emissions, inventory of their sources, and preparation of relevant reports.

- Taking measures to reduce greenhouse gas emissions and improve energy efficiency within the Partnership, such as minimizing routine gas flaring, reducing liquid fuel combustion, optimizing resource utilization, and pursuing other initiatives to improve environmental sustainability and operational efficiency.

- Training and professional development of employees in the field of greenhouse gas emissions, participation in conferences, seminars, and forums.

**Greenhouse Gas Emissions Management Policy
of Ural Oil & Gas LLP**

Revision: No. 3, UOG-HSE-PC-005

2 out of 2

- Ensuring that Employees, Contractors, Shareholders, and the public are informed about the Partnership's approach and results in managing greenhouse gas emissions.

Partnership's Management will regularly update Greenhouse Gas Emissions Management Policy to ensure its relevance.
